

Isaiah Moragne

Analyst | Technical Product Management | MBA, Finance

Notre Dame, IN | 574-218-4269 | isaiahmoragne12@gmail.com | linkedin.com/in/isaiahmoragne

PROFESSIONAL SUMMARY

Lead Business Analyst with 5+ years of experience in data strategy, Enterprise Resource Planning (ERP) integration, and technical product management in the e-commerce and digital sectors. Delivers repeatable systems and deployable solutions using SQL, Python, Tableau, and Power BI, including multi-agent AI documentation workflows that save 40 analyst hours per week and workflow redesigns that raised project completion speed 22% year over year. MBA with a Finance concentration; pairs product ownership and requirements leadership with forecasting, budgeting, and financial modeling.

CORE COMPETENCIES

Data and Analytics: SQL, Python, Tableau, Power BI, Salesforce, ERP Systems, Business Intelligence (BI) Reporting, Data Pipeline Design, Dashboard Development, Key Performance Indicator (KPI) Analysis

Product and Operations: Product Ownership, Product Roadmap Planning, Business Requirements Documentation (BRD), Agile/Scrum, Jira, Confluence, Workfront, Figma, Stakeholder Management, Cross-Functional Project Leadership, A/B Testing Frameworks, Change Management

Business and Finance: Forecasting, Budgeting, Financial Modeling, Business Process Mapping, Resource Allocation, Quarterly and Monthly Business Review (QBR/MBR) Reporting

AI and Automation: Multi-Agent Workflow Orchestration, Large Language Model (LLM) Integration (Claude, OpenAI), Process Automation, Microservices Migration, React Platform Requirements

PROFESSIONAL EXPERIENCE

Analyst II

January 2025 - Present

Tire Rack, Remote

- Design multi-agent AI workflows using orchestration techniques for Claude and OpenAI models, fully automating documentation across Jira, Confluence, Workfront, and Word; measured 40 hours of weekly time savings across the analyst team.
- Built a centralized Confluence information system that aggregates BI data into a sorted, searchable knowledge space, cutting internal information queries from 5 touch points to 2 and increasing project completion speed 11% year over year (approximately 18 days saved).
- Lead product requirements development for cross-functional initiatives spanning multiple departments, translating business needs into clear, actionable specifications for engineering and operations teams.
- Champion the migration of the core product from a monolithic architecture to microservices, including adoption of React as the new front-end foundation, while maintaining requirements continuity between legacy and modern systems.
- Own product management for the B2B division, defining feature priorities, roadmap milestones, and partner integration requirements for business clients.
- Expanded the requirements team 100% year over year through strategic hiring, structured onboarding, and workflow optimization, increasing team capacity and project throughput.

Analyst

December 2022 - December 2024

Tire Rack, Remote

- Designed optimized project workflows and reporting dashboards that improved task prioritization and resource allocation, increasing project completion speed 22% year over year.
- Built and maintained requirements collection pipelines and review processes, achieving approximately 95% alignment between feature implementations and business development objectives.
- Integrated new requirements methods into existing ERP systems, streamlining change management for in-flight projects and reducing total project completion time 18% year over year.
- Developed a structured analyst onboarding program with standardized training materials and templated resources, cutting ramp-up time by 5 weeks and enabling self-sufficient reporting.

EDUCATION

Master of Business Administration (MBA), Finance Concentration

Indiana University

Bachelor of Arts (BA) in Business Management, Minor in Marketing

Holy Cross College
